

Solocorn

Live AI-Augmented Instruction Platform

solocorn.co

Teaching scales.

Feedback does not.

The Feedback Bottleneck

Evaluation is delayed and often degraded.

AI-Augmented Instruction

AI evaluates student work using instructions defined by teacher.

How Solocorn Works

Immediate feedback during instruction

Works With Existing Classrooms

The teacher remains central. AI augments evaluation and feedback.

- ↑ Preserves trust in human instruction
- ↑ Integrates easily into existing classrooms

- ↑ Improves feedback without changing teaching methods

Instruction at Scale

AI removes the evaluation bottleneck

Scaling Instruction Reduces the Cost of Tutoring

When instruction scales, tutoring becomes affordable for millions of students.

AI-augmented instruction makes high-quality tutoring accessible worldwide.

Creator-Led Growth

Turn global viewers into active students.

Some educational creators attract millions of followers, and celebrity tutors already exist in markets such as Korea and Hong Kong.

Revenue Model

A global infrastructure platform for live AI-augmented instruction

Global Education & Tutoring Market

↑ Global demand for tutoring ↑ Creator-educator economy ↑ AI-enabled instruction platforms

A global infrastructure platform for live AI-augmented instruction

Platform Expansion Strategy

From creator-led learning to global education infrastructure

Beyond Tutoring: A Platform for Interactive Learning

The Solocorn architecture can power multiple live learning formats.

Solocorn Podcasts

Interactive educational podcasts with live Q&A for large audiences.

Solocorn Podcasts

Solocorn Remote Testing

Secure environments for proctored live online tests.

Solocorn Remote Testing

Solocorn Conferences

Interactive educational conferences with real-time audience engagement.

Solocorn Conferences

A platform for live AI-augmented learning at scale.

FOUNDERS

Built by educators.

Kon (Jason) Kim
Co-Founder & CEO

Veteran educator in international secondary
programs
Curriculum design: IGCSE, AP, Cambridge AS English
Specialist in standardized test preparation

Stephen Nazieh
Co-Founder & CTO

MSc Applied Statistics
Mathematics educator: AP Calculus & AP Statistics
CompTIA Security+ certified

Our Team

Junhyeok (Patrick) Choi
Senior Software Engineer

Senior technical founder & software engineer
AI machine vision, AWS systems, backend/API
architecture

Developed industrial AI software used by
Hyundai/KIA suppliers
